

Andy Niner

“We live in an amazing place and we take great pride in sharing that with our guests.

We offer multiple experiences at our tasting room and restaurant where guests can experience the beauty of our estate.

You can do a wine tasting in our tasting room, you can go for a tour of our winery, you can sit in our grounds and have a glass of wine and experience the beauty of Heart Hill, or you can have lunch in our restaurant where we explore the intersection of food and wine.

What makes our restaurant truly unique is our approach to food and wine pairing and the sourcing of our ingredients.

We build dishes from the wine up so we really explore that intersection between food and wine and the moments you have when the pairing is exactly right and we take great pride in sourcing both from our own estate and from our neighbors and are always featuring ingredients that are from the Central Coast and very close to where we live and work.

Our Restaurant was recognized as one of the best winery restaurants in the US by Food & Wine Magazine which is a huge credit to our team.”

Pam Niner

“This is a spectacular place to be and we wanted the buildings to echo that. We control the whole process from the growing of the grape to the producing of the wine to the selling of the wine and the reason for that is to keep the quality as high as it can conceivably be growing in this area. It's just going to get better and better. We are really looking forward to that.”
